Sponsors, Endorsments & Hosts

Dear Colleagues and Friends,

The continuation of the Advanced Course in Minimally Invasive Thoracic Surgery will happen in its 4th edition this year. We are thrilled to make this educational event, specifically tailored for surgeons and medical professionals eager to expand their knowledge and skills in the latest thoracic surgical techniques. We have carefully crafted a thorough curriculum that encompasses the most cutting-edge procedures and technologies in minimally invasive thoracic surgery. Our aim for 2026, along with our international faculty, is to offer you hands-on experience, wet labs, engaging lectures, and interactive discussions that will elevate your abilities and empower you to provide the highest standard of care to your patients.

With our special collaboration with the Chest Wall Injury Society (CWIS), a prestigious organization known for its significant contributions to thoracic surgery, we have incorporated a specialized module focused on the management of chest wall injuries. This module will cover the latest innovations and best practices, providing participants with valuable insights and practical skills from leading experts in the field of chest wall surgery.

We invite you to participate in this exceptional learning experience, where you will have the opportunity to network with colleagues, share ideas, and explore the future of thoracic surgery. Your involvement will not only facilitate your professional development but also contribute to the advancement of minimally invasive techniques within our specialty.

We eagerly anticipate welcoming you to an enriching and inspiring course.

Sincerely,

Miguel Martínez Arias & Dr. Diego González Rivas
